The Future of Cinema Viewing

# Bring your establishment into the future with NEC Digital Cinema Projector

Exceptional image and colour quality meet the latest in digital cinema technology to deliver new revenue-generating opportunities for theaters and cinema events. These advanced solutions are backed by NEC, the trusted leader in DigitalCinema Technology.

## Generate Greater Per Seat Revenue

Achieve additional income from showing higher quality more entertaining media and arranging alternative sports, broadcast and education media during off peak operational times.

## Play Captivating 3D Content

Take your establishment into NEC Digital Cinema Projectors and stay ahead of your competition with the latest Digital Content, which is becoming more and more an essential element of the latest movies and media.

## Enjoy Lower TCO

With easy servicing, more durable components and advanced servicing options you can enjoy better quality imaging while experiencing an overall lower cost of ownership.

Using DLP Cinema® technology from Texas Instruments®, NEC's innovative digital cinema projectors deliver exceptional image quality, brightness, resolution, contrast and colorimetry. NEC's 2K/4K digital cinema projectors are designed with a focus on quality and ease-of-use for movie theatres of all sizes. Together with the new, optional integrated NEC 2K/4K Media Block and NEC Local Storage Server, they provide complete and compelling industry solutions for showing digital movies.

## FULLY COMPLIANT WITH DCI REQUIREMENTS\*

### BAR-SETTING RELIABILITY

- New completely independent airflow systems help secure best in class reliability with one airflow section for electronics/optics and another strictly for lamp cooling. This new system prevents any cross contamination between sections.

- In addition, advanced dust/oil prevention is achieved with higher inside air pressure and specially designed high tech electrostatic fiber filters that can be exchanged from outside the projector without and special tools.

### MINIMAL COST OF OWNERSHIP / SIMPLE MAINTENANCE

- Quick and easy components/parts replacement with modular electronics
  - Clear electronic layout and wiring.
  - Easy prism replacement can be completed in only a few minutes.
  - Truly modular electronics; custom DMD shielding gaskets and patented reflector design help reduce maintenance costs.
- Industry-leading system service and support
  - Quick and easy troubleshooting by self-diagnosis with built-in system test and error log analysis.
  - Built-in web server allows you to access and control projectors from any authorized web browser.
  - Remotely update firmware via network from long distances.

### BEST-SUITED PROJECTOR FOR 3D APPLICATIONS

- The NC3200S and NC3240S are the brightest digital cinema projector available, boasting 31,000 lumens.
- 3D presentation using a single projector - Support for all major suppliers of 3D accessories, including:
  - Special 3D control connector.
  - Optional automatic turret to mount polarizers in front of lens when displaying 3D content.

### UNRIVALED EASE OF USE

- One-Touch Operation and Memory Functions - Direct-select buttons for eight stored projector configurations; simplify display of different aspect ratios through pre-set lens shift position, zoom and focus, and lamp power settings.
- Auto Lamp Brightness Control - Maintains constant brightness of the lamp by adjusting the lamp power as the lamp ages. These projectors optimize lamp performance and ensure the brightest and most uniform image possible for the life of the lamp.
- Trouble-Free Lamp Replacement - Maintenance personnel can replace lamps simply from the back of the projector even in a cramped space.
- Intuitive keypad layout provides for easy operator control.

### INDUSTRY-LEADING MEDIA BLOCK - ONE-STOP SOLUTION

- NEC optional 2K/4K Media Block\* - Internal design for content management, screen management and higher security, providing greater peace of mind.
- Designed to work with third-party company legacy media blocks and servers.

\* NC1200C, NC2000C and NC3200S have passed the Digital Cinema System Specifications Compliance test and are listed on the DCI url <http://www.dcmovies.com/compliance/>. NC3240S is now under testing with NEC Media Block and planned to be passed early in summer 2011

## NEC's Industry-Leading Integrated 2K/4K Media Block and Storage Server as ONE STOP Solution

- Internal design for content management, screen management and higher security, providing greater peace of mind
- Server connection via GBit Ethernet, the easiest and most flexible connection
- Both 2K and 4K content playback
- Total cost down with open solution
  - Provides control of Media Block from the projector
  - Simpler management of cinema content/system
  - Possible to integrate cinema ad into NEC Media Block/Server solution
- Easy Maintenance to minimize the downtime
  - Single maintenance window for NEC projectors, NEC Media Block and NEC Storage Server
  - Easy and timely troubleshooting by self-diagnosis within the projector
- High Reliability
  - Media Block built in the projector
  - Higher (stricter) security
  - No interference between Projector and existing screen server

### Optional (NC3240S/NC3200S)

#### ● Built-in Multi-Media Switcher MM3000B

- Dedicated stand
- Filter set for lamp (NC-80AF01)\*1 6 x square filters. 3 x filters are required for one replacement.
- Filter set for circuit (NC-80AF02)\*1 4 x rectangular filters. 4 x filters are required for one replacement.

\*1 Please replace the air filters every 6 months.  
\* Optional products and accessories are subject to change without prior notice. Contact your local dealer for more details.  
\* Please use NEC certified digital xenon lamps listed on the below URL  
[http://www.nec-display.com/ap/en\\_projector/dlpcinema/lamp/certified-lp.html](http://www.nec-display.com/ap/en_projector/dlpcinema/lamp/certified-lp.html)

### Primary lens (NC3240S)

Model of lens	Projection magnification
L2K-12ZM	1.13 ↔ 1.31
NC-50LS12Z	1.13 ↔ 1.66 (Available in summer 2011)
NC-50LS14Z	1.30 ↔ 1.85
NC-50LS16Z	1.44 ↔ 2.16
NC-50LS18Z	1.63 ↔ 2.71
NC-50LS21Z	1.95 ↔ 3.26
L2K-30ZM	2.71 ↔ 3.89

### Primary lens (NC3200S)

Model of lens	Projection magnification
L2K-12ZM	1.25 ↔ 1.45
NC-50LS12Z	1.25 ↔ 1.83 (Available in summer 2011)
NC-50LS14Z	1.44 ↔ 2.05
NC-50LS16Z	1.60 ↔ 2.40
NC-50LS18Z	1.80 ↔ 3.00
NC-50LS21Z	2.15 ↔ 3.6
L2K-30ZM	3.00 ↔ 4.30

### Primary lens (NC2000C/NC1200C)

Model of lens	Projection magnification
NC-60LS12Z	1.2 ↔ 1.8
NC-60LS14Z	1.4 ↔ 2.05
NC-60LS16Z	1.59 ↔ 2.53
NC-60LS19Z	1.9 ↔ 3.25
NC-60LS24Z	2.4 ↔ 3.9
NC-60LS39Z	3.9 ↔ 6.52

### Wide Converter Lens (x 1.26)

### Lens shift range (NC3240S)

### Lens shift range (NC3200S)

### Lens shift range (NC2000C/NC1200C)

The lens shift range differs according to the model of the lens.

Ideal as a built-in enhancement of NEC digital cinema projectors, the MM3000B converts video signals from various external sources—such as PCs, analog/digital tape decks and satellite receivers—to allow DLP Cinema® projectors to screen everything from live concerts and sporting events to computer presentations.

The built-in MM3000B is available for all models of the NEC Digital Cinema Projector Series—the NC3240S, NC3200S, NC2000C and NC1200C.

### HIGH-QUALITY VIDEO

- Integrated Realta® video processor with Hollywood Quality Video (HQV®) technology
- 3-D motion adaptive de-interlacing with multi-directional diagonal filter for standard-definition (SD) and high-definition (HD)
- Multi-cadence detection including automatic detection of 3:2 / 2:2 pull-down signals and many other film formats
- Per-pixel motion adaptive noise reduction for SD
- Per-pixel detail enhancement brings out more visible details
- Full 10-bit image processing for SD, HD and video sources
- High contrast images with NEC's unique contrast enhancement technology for SD
- Integrated Device Technology HQV®  
It is a high-performance video processing/scaling system designed for computer signals as well as standard or high-definition video. The technology produces superior video processing using pixel-based, motion-adaptive de-interlacing to remove undesirable motion artifacts typical of interlaced signals. This processing creates life-like images in applications such as video conferencing.

### EASY TO OPERATE

- One-touch selection of input signals from NEC Digital Cinema Projector Series models
- Quick and flexible connection of input signals from two input modules

### STANDARD INPUT BOARDS

- HDCP-compliant DVI input board (MM-70DV01)
- Analog/RGB input board (MM-RGB-E)

### OPTIONAL INPUT BOARDS

- Single HD-SDI input board (MM-SDI-E)
- Video input board (MM-Video-E)

### Specifications

Input signal	Color Bit Depth	10 bits for all processes for each color (excluding optional RGB and DVI input board)
	I/P conversion	Multi-directional filtering method (SDTV, HDTV)
	Noise reduction	3:2, 2:2 pull down signal, animation format compatible type
	Enhancer	Per-pixel motion adaptive method (SDTV)
	Image latency	Multi-directional filtering method Contrast enhancement (function expansion) Interlace: 8 to 9 fields Progressive: 4 frames
Input slot	2 slots (MM-RGB-E and MM-70DV01 as standard)	
	MM-RGB-E (standard)	RGBHV R, G, B: 75Ω 0.7Vp-p Y: 75Ω 1.0Vp-p (with Sync) Cb, Cr: 75Ω±0.35Vp-p H/V: 1KΩ/TTL 75Ω/0.7-2.0Vp-p Selection system - positive or negative polarity C/S: 1KΩ/TTL 75Ω/0.7-2.0Vp-p Selection system - positive or negative polarity Sync on Green: 75Ω 1.0Vp-p/75Ω 1.0Vp-p
